In the original published version of this article, there was an inadvertent error in page 1480, under the subchapter "*The status of wild anadromous sturgeon species in the Lower Danube*", second sentence.

The sentence currently reads: Within the years of studying their populations effectives and behavior, it was concluded that 2 species are already extinct: *Acipenser ruthenus* and *Acipenser nudiventris*.

The correct form of the sentence should be: Within the years of studying their populations effectives and behavior, it was concluded that 2 species are already extinct: *Acipenser sturio* and *Acipenser nudiventris*.

The correction refers specifically to the replacement of *Acipenser ruthenus* with *Acipenser sturio*.

All authors have approved the submission of this corrigendum.
